REQUIRED DOCUMENTS AND FORMS FOR IRB APPLICATIONS

The IRB reviews and approves supporting documents to the IRB application for the following purposes:

- 1. Information included in the document is necessary for the IRB to determine if the study meets the <u>Criteria for IRB Approval of Research</u>, as well as other applicable federal regulations.
- 2. The document will be provided to research participants and will assist them in making an informed choice about participation in the study.

Supporting documents that do not meet these purposes should not be submitted to the IRB for review and approval. Investigators are responsible for maintaining up-to-date versions of all supporting documents, including those reviewed and approved by the IRB and those that do not require IRB review.

Documentation of Approval/Permission for Research Conducted in Collaboration with External Sites

The IRB does not generally require that documentation of approval or permission from external sites be attached to the IRB application. When the University of Utah Investigator is the Lead PI of a multi-site study, the Lead PI is responsible for maintaining documentation of IRB approval for all sites that are engaged in research. Similarly, if an external site is not engaged in research, University of Utah Investigators are responsible for documenting that permission from the site has been granted before research procedures are conducted at the site. All documentation of approval/permission must be included in the research record and made available upon request.

In exceptional circumstances, the IRB may require that approval/permission documentation be attached to the IRB application in order to receive IRB approval. Such circumstances include, but are not limited to, the following:

- The topic of the research is considered especially sensitive.
- The participant population has a high level of vulnerability.
- The legal or reputational risk to the participants or the institution is high.

This guidance document includes a list of supporting documents that are required to be included with the IRB application and meet the purposes described above.

New Study Applications

Attach required and supporting documents to the Documents and Attachments page of the New Study Application.

Social and Behavioral Science Projects		Biomedical and Health Sciences Projects			
☐ Method of Consent Documentation; may include one or all		☐ Method of Consent (and Authorization, as applicable)			
	of the following:	Documentation; may include one or all of the following:			
	o Consent Document	o Consent and Authorization Document			
	o Parental Permission Document	o Parental Permission and Authorization Document			

Please contact the IRB Office at (801) 581-3655 or irb@hsc.utah.edu for additional guidance.

Once of Consent Cover letter On Short Form and Written Summary (Short Form does not need to be attached if using the University of Utah IRB approved version) Request for Walver of Documentation of Consent (form completed in the ERIX have study application, as applicable) Recruitment materials, including advertisements or information intended to be seen or heard by potential participants Full protectol (e.g., sponsor protocol), if the study is sponsor-initiated by industry, 10HIS, etc. DHIS-approved sample consent document (when one exists) Grant application with budget but no appendices, for federal grounding agencies Grant application with budget but no appendices, for federal grounding agencies Grant application with budget but no appendices, for federal grounding agencies Grant application with budget but no appendices, for federal grounding agencies Grant application with budget but no appendices, for federal grounding agencies Grant application with budget but no appendices, for federal grounding agencies Grant application with budget but no appendices, for federal grounding agencies Grant application with budget but no appendices, for federal grounding agencies Grant application with budget but no appendices, for federal grounding agencies Grant application with budget but no appendices, for federal grounding agencies Grant application with budget but no appendices, for federal grounding agencies Grant application with budget but no appendices, for federal grounding agencies For Investigational Drug Data Form (completed decironically in the structure) For Investigational Drug Data Form (completed on Final Application) For Investigational Drug Data Form (completed on Final Application) For Investigational Drug Data Form (completed on Final Application) For Investigational Drug Data Form (completed on Final Application) For Investigational Drug Data Form (completed on Final Application) For Investigational Drug Data Form (completed on Final Application) For Inves		Assent Document		Assent Document

	o The information included in the document is necessary for the IRB to determine if the study mee the Criteria for IRB Approval of Research, as well as other applicable federal regulations. o The document will be provided to the research participants and will assist them in making an informed choice about participation in the study.

Continuing Review Applications

Attach any updated/revised documents to the Update Study application, Documents and Attachments page, including new consent documents that need to be approved for another year.

- ☐ Currently approved Method of Consent (and Authorization, as applicable) Documentation; must include a clean copy for a new electronic stamp
 - o If a study is permanently closed to new enrollment, it is not necessary to provide a currently approved consent form. The consent document will not receive a re-approval stamp (i.e., watermark) unless there is a specific request and explanation from the principal investigator or sponsor.
- Any other supporting material relevant to the proposed research, it if exists. This includes relevant multi-center trial reports, current risk-benefit assessments based on the study results, and participant benefits.

In addition, applications are required to submit the following, if applicable to the research:

- ☐ Documentation of ancillary approvals from subcommittees for which the University of Utah has research oversight, such as:
 - o Protocol Review and Monitoring Committee (PRMC) **
 - o Conflict of Interest management plans (COI) **
 - o Institutional Biosafety Committee (IBC) **

Please contact the IRB Office at (801) 581-3655 or irb@hsc.utah.edu for additional guidance.

Amendment Applications

Attach any updated/revised documents to the Update Study application, Documents and Attachments page.

- ☐ All previously approved documents that are affected by the proposed changes must be submitted. A draft/tracked copy that highlights these changes and a clean copy are required for adequate review.
- $\hfill \Box$ Any new documents created/required as a result of the proposed changes.
- $\hfill \Box$ Any other supporting materials relevant to the proposed changes, if it exists.

In addition, applications are required to submit the following, if applicable to the research:

- Documentation of ancillary approvals from subcommittees for which the University of Utah has research oversight, such as:
 - o Protocol Review and Monitoring Committee (PRMC) **
 - o Conflict of Interest management plans (COI)
 - o Institutional Biosafety Committee (IBC)
 - o Primary Children's Hospital ***
 - o Radiological Drug Research Committee (RDRC)
 - o Resource for Genetic and Epidemiological Research (RGE)
 - PIVOT Center
 - Veteran Affairs Salt Lake City Health Care System (VASLCHCS) ***
